Our Advanced Search helps you locate specific reports and other resources housed on our website. You can use the following details to locate the information you are seeking.

- Enter your initial search description in the **Search field** at the top of Find a Report page.

- All the results generated for your search query will appear directly underneath the Search field.

- The left navigation column will provide additional categories you can use to filter your search (division, county, report type, and more).

- Clicking the down arrow will expand each category your search generates and allow you to select and refine the results.

- A quick glance list of each filter you select will show up above the results list.

- You can deselect categories individually or remove them all at once by selecting **Clear All Filters**.

- You can sort your search results by **Date** and **Relevance** using the sorting options at the top right of your results list.

- If you have questions about using the search or need additional assistance, please contact the COT Technology Solutions Service Desk at **ServiceDesk@cot.tn.gov**.
