

Tennessee Trends

*This publication is the **second installment** in an ongoing series highlighting education trends in Tennessee. Other installments in the series address teacher salaries, ELL students, and other important trends. For more details about the Tennessee Trends series or to request additional information, visit the OREA website at www.comptroller.tn.gov/OREA/.*

- ★ Tennessee's high school graduation rate has increased over the past four school years, rising from 87.9 percent to 89.1 percent. The graduation rate has remained steady for the past two years.
- ★ Tennessee has received national attention because of its steady increase in high school graduation rates over the last several years. Over one-third of school districts with high schools in the state have graduation rates at or above 95 percent.
- ★ Every student entering the 9th grade is part of a cohort of students who are expected to graduate within four years. At the end of the 12th grade, only those students in a cohort who successfully complete all requirements to achieve a regular high school diploma are then counted as graduates. The graduation rate comprises all summer terms, including the summer term after 12th grade.

High School Graduation Rate 2015 to 2018
